

- Ancient Tree Inventory
 - Managed by the Woodland Trust
 - Currently 160,000 or so are registered
 - <https://ati.woodlandtrust.org.uk/>
- Objectives
 - To identify ancient, veteran and notable trees
 - Provide a degree of protection, which currently is minimal
 - Protect the biodiversity that is supported by ancient trees, fungus, invertebrates, birds and mammals
 - Enable scientists to get a picture of the impacts of climate change on trees

- Local Trees
 - Hutton Rudby
 - Cherry plum – tree of National Special Interest

Inventory [Add a tree](#) [What we record and why](#) [How to record](#) [Tree](#)
